GENERAL SKILLS:

Graphic Design

Full-Stack Web Development

Software Troubleshooting

Database Management

Project Management

Cybersecurity Fundamentals

Network Administration

IT Support

SPECIFIC SKILLS:

- Web Development:** Expertise in PHP custom codes, JavaScript (ES6+), HTML5, AJAX, and Bootstrap for building scalable, dynamic web applications. Proficient in front-end and back-end development.
- Networking & Security:** Solid understanding of TCP/IP, DNS, HTTP/HTTPS, VPN, and network protocols. Hands-on experience with Wireshark, Nmap, Firewalls, VPN, and general network security practices.
- Graphic Design & UI/UX:** Proficient in Adobe Photoshop, Corel Draw for graphic. Experienced in creating intuitive user interfaces and working within design systems.
- Problem Solving & Leadership:** Exceptional critical thinking, troubleshooting skills, and the ability to mentor and lead teams effectively in dynamic work environments.

PROJECTS:

- Learning Management System (LMS):** Built a complete web-based platform for online learning with features like student registration, course management, and assessment tracking using PHP, MySQL, and JavaScript.
- School Management System (SMS):** Developed a full-stack system to manage school operations including student records, staff management, fee processing, and result computation. Integrated secure login and role-based access.
- Network Simulation – Cisco Packet Tracer:** Designed and simulated real-life networking scenarios using Cisco Packet Tracer, applying routing protocols, VLANs, and security configurations to solve real-world networking challenges.
- Security+ Training Projects (In Progress):** Engaging in cybersecurity labs and projects as part of CompTIA Security+ training. Focus areas include threat analysis, security protocols, and vulnerability management.

EXPERIENCE:

Website manager

| 2020-Till date

Sunkkytravels & Tours | 2020 – 2025

- Developed and maintained a secure, user-friendly website while ensuring the protection of client information
- Optimized site performance, reducing load times by 40%, which enhanced user experience and engagement.
- Implemented SEO strategies that improved search engine rankings, leading to a 30% growth in online inquiries.
- Collaborated with marketing and sales teams to create engaging content, resulting in a 20% increase in website traffic.

Product Manager / Full- Stack Developer

| 2024-Present

Mariobee School Management System

- Conceived, designed, and built a full-scale Learning Management System (LMS) and School Management System from idea to market-ready MVP and improve the efficiency by 60%.
- Led product planning, user flow design, and backlog prioritization

EDUCATION:

B.Sc in Anatomy,

| 2019 - 2023

Olabisi Onabanjo University
